A Message to our Readers

Thank you for using the 2019 edition of this manual which has been revised to reflect the most current evidence based research and national/international guidelines for nutrition including new guidelines for cardiovascular disease, diabetes, pressure injuries and other diseases and conditions.

This manual includes information from the 2015-2020 Dietary Guidelines for Americans which called for many changes to eating and activity habits. These changes will take place over time, but we felt that it was extremely important to provide you with the most up to date information available.

Since so many settings serve older adults in health care communities such as nursing facilities and assisted living facilities, acute, sub-acute, transitional care and rehabilitative settings, we have incorporated notes on each diet regarding the need to individualize and provide the least restrictive diet appropriate for each older adult. Recommendations for individualization are based on a comprehensive nutrition assessment by a registered dietitian nutritionist (RDN) with assistance as appropriate from the nutrition and dietetics technician, registered (NDTR), and orders from the physician.

Food can have a major impact on quality of life for older adults especially for those with acute, severe chronic or end stage conditions. Each individual has their own special relationship with food, including social, psychological, cultural and religious associations. Overly restrictive diets have the potential to cause decreased satisfaction which may in turn lead to decreased food consumption, unintended weight loss, and other complications. For older adults in health care communities, the goal should be to increase quality of life and enjoyment, while still providing excellent nutrition care. This can be accomplished by providing the least restrictive diet possible with a focus on person centered dining including choice of foods, dining times, dining partners, and assistance at meal time.

Every health care provider is unique, and the population each provider serves is also unique. In order to meet the varied needs of practitioners, we offer many diet choices and additional helpful nutrition care information. This manual was designed to assist the practitioner to:

1. Provide appropriate medical nutrition therapy (MNT) while enhancing quality of life.
2. Interpret diet prescriptions and implement appropriate nutrition care.
3. Understand the role of MNT in treating various diseases and conditions.
4. Determine the best approach for MNT based on individualized assessment of nutritional and other needs.

We hope that the suggestions in this manual will help satisfy individual patients/residents, clients, families, physicians and regulators, while providing excellent resources for professional staff.

This manual is dedicated to the many individuals we have had the opportunity to serve through our nursing facilities, hospitals, assisted living facilities, hospices, home health agencies, group homes and other settings. Our mission has always been to improve the quality of life of the people we serve through excellence in nutrition care. Our hope is that this manual will help its users achieve a similar goal.

We Welcome Your Comments!

In our constant effort to serve your needs and improve this manual, your comments are always appreciated. Please send them to:

License Agreement and Restrictions

YOU SHOULD CAREFULLY READ THE FOLLOWING TERMS AND CONDITIONS BEFORE USING THIS MANUAL AND CD-ROM OR OTHER ELECTRONIC VERSIONS. USING THIS MATERIAL INDICATES YOUR ACCEPTANCE OF THESE TERMS AND CONDITIONS.

LICENSE. The materials that are the subject of this Agreement (hereinafter referred to as the “Licensed Materials”) shall consist of printed materials, electronic information, audio or video/DVD information or published information in any form by Becky Dorner & Associates, Inc. (hereinafter referred to as BD&A). Licensee and its Authorized Users acknowledge that the copyright and title to the Licensed Materials and any trademarks and service marks relating thereto remain with BD&A. Neither Licensee nor its Authorized Users shall have right, title or interest in the Licensed Materials except as expressly set forth in this agreement. In consideration of payment, BD&A hereby grants Licensee a non-exclusive, non-transferable, and revocable License to make permitted use of the Licensed Materials and to provide the Licensed Materials to Authorized Users in accordance with this Agreement.

USAGE. The Licensee shall ensure that only Authorized Users are permitted access to the Licensed Materials. Licensee may install and/or use Licensed Materials based on the agreed upon number of Authorized Users per terms of the Purchase Agreement, Letter of Agreement or Invoice. Licensee is not permitted to make unauthorized copies, alterations or modifications to the Licensed Materials unless specified in the Users’ Manual or by prior written authorization of BD&A. Other than as specifically permitted in this Agreement, Licensee may not use the Licensed Materials for commercial purposes, including but not limited to the sale of the Licensed Materials or bulk reproduction or distribution of the licensed materials in any form.

MATERIAL CONTENT. The Licensed Materials are provided for your own personal, educational non-commercial use as a resource aid only. If you intend to use this material for the nutritional needs of an aged, sick or injured person or a person who suffers from a chronic disorder or disease, you should first consult that person’s physician or physicians and if none, a physician who practices in the applicable field of medicine.

The Licensed Materials are in the nature of general concepts and, therefore, where its use may be appropriate for one person, its use may not be appropriate for another. The Licensed Materials are not intended to be a substitute for professional medical advice. Consequently, BD&A shall not be liable for any loss or damage directly or indirectly to the Licensee or Authorized Users of any material or information contained in the licensed materials.

LIMITATIONS ON WARRANTIES. BD&A shall not be liable to the Licensee for any indirect, special, incidental, punitive or consequential damages, including but not limited to loss of data, business interruption, or loss of profits arising directly or indirectly from or in connection with the license granted under this Agreement. The forgoing applies regardless of whether the claim or damages result or arise under breach of contract, tort, or any other legal theory.

BD&A makes no representation or warranty, and expressly disclaims any liability with respect to the content of any Licensed Materials, including but not limited to errors or omissions contained therein, libel, infringement of rights of publicity, privacy, trademark rights, moral rights, or the disclosure of confidential information. Except for the express warranties stated herein, the Licensed Materials are provided on an “as is” basis, and BD&A disclaims any and all other warranties, conditions, or representations (express, implied, oral or written), relating to the Licensed Materials or any part thereof, including, without limitation, any and all implied warranties of quality, performance, merchantability or fitness for a particular purpose. BD&A makes no warranties respecting any harm that may be caused by the transmission of computer virus, worm, time bomb, logic bomb or other such computer program. BD&A further expressly disclaims any warranty or representation to Authorized Users, or to any third party.

ACKNOWLEDGEMENT. THE LICENSEE AND AUTHORIZED USERS ACKNOWLEDGES THAT THEY HAVE READ THIS LICENSE, UNDERSTAND IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS.

Author/Editor:
Becky Dorner, RDN, LD, FAND is widely-known as one of the nation’s leading experts on nutrition, aging, and long-term care. An extensively published author and experienced speaker, Becky is Founder/President of Nutrition Consulting Services, Inc., whose dedicated team of RDNs/NDTRs have served health care facilities in Ohio since 1983; and Becky Dorner & Associates, Inc., which provides a broad library of credible continuing education (CE) programs and nutrition resources.

Becky has published more than 300 health care articles, manuals and CE programs; presented more than 500 programs for national, international and state professional meetings in 5 countries and 50 states; and hosted more than 140 national professional CE webinars. Her free email magazine keeps 35,000 health care professionals up to date on the latest news in the field.

An active leader since 1984, national leadership positions have included: Academy of Nutrition and Dietetics Board of Directors, Speaker-elect/Speaker/Past Speaker of the House of Delegates, Chair of the Council on Future Practice, Academy Research Committee, Evidence Analysis Library, Academy Delegate, Chair, Consultant Dietitians in Health Care Facilities (now Dietetics in Health Care Communities or DHCC) Dietetic Practice Group (DPG), and Board of Directors National Pressure Ulcer Advisory Panel.

Honors include: Fellow of the Academy of Nutrition and Dietetics (Academy), Academy Award of Excellence in Business and Consultation, NE Outstanding Nutrition Entrepreneur, Academy Recognized Young Dietitian of the Year and DHCC Distinguished Member Award.

Contributing Editor:
Liz Friedrich, MPH, RD, CSG, LDN, FAND is a Registered Dietitian and president of Friedrich Nutrition Consulting in Salisbury, NC. The company provides a variety of nutrition consulting services with a focus on gerontological nutrition.

Liz is a Board Certified as a Specialist in Gerontological Nutrition. She has co-authored numerous articles in journals and magazines and is an evidence analyst for the Academy of Nutrition and Dietetics (Academy) Evidence Analysis Library. She was Associate Director of Nutrition411.com, a respected website for dietitians.

Liz has served as the Delegate for the Nutrition Entrepreneurs dietetic practice group to the Academy of Nutrition and Dietetics House of Delegates, and as a volunteer for the North Carolina Dietetic Association (NCDA) and the Nutrition Entrepreneurs Dietetic Practice Group (NE DPG) in many different board positions. She is the recipient of two North Carolina Dietetic Association awards, the Recognized Young Dietitian of the Year (1991) and the Member of the Year (2000).
Diet and Nutrition Care Manual

Review and Approval

This manual has been reviewed and approved for use in the following facility:

<table>
<thead>
<tr>
<th>Facility Name</th>
<th>Address</th>
</tr>
</thead>
</table>

The diet and nutrition care manual should be reviewed and approved annually by the registered dietitian nutritionist, director of nursing, speech language pathologist, medical director, and the administrator. The therapeutic diet prescriptions generally utilized are described in this manual.

The diet and nutrition care manual should be revised at least every three to five years, and should be accessible to both the food service and nursing staff. Copies of the manual should be available in the foodservice and nutrition departments, as well as the nursing office and nurses’ stations as appropriate.

Diet and Nutrition Care Manual

Consistent Carbohydrate Diet

Individuals with diabetes or difficulty controlling blood glucose (BG) levels may be placed on a consistent carbohydrate diet. This diet provides meals of consistent carbohydrate amounts at consistent times throughout the day. These guidelines are intended for use with adults. Provide adequate nutrients as recommended by the Dietary Guidelines and National Research Council by using these guidelines to provide three balanced meals and up to three snacks daily:

<table>
<thead>
<tr>
<th>Food</th>
<th>Amount Each Day*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vegetables (include more dark green, leafy, red/orange vegetables; dry beans/peas/lentils)</td>
<td>≥2 ½ cups or equivalent</td>
</tr>
<tr>
<td>Fruits (include a variety; with more whole fruit than juice as appropriate)</td>
<td>≥2 cups or equivalent</td>
</tr>
<tr>
<td>Grains (include as much whole grain/enriched as possible; at least half of grains should be whole)</td>
<td>≥6 oz or equivalent</td>
</tr>
<tr>
<td>Dairy (fortified with vitamins A and D)</td>
<td>3 cups or equivalent</td>
</tr>
<tr>
<td>Protein Foods (i.e. fish, seafood, lean meat, poultry, eggs, dry beans/peas/lentils, soy products, nuts)</td>
<td>5-6 oz or equivalent (Encourage 6 oz of cooked seafood per week.)</td>
</tr>
<tr>
<td>Sodium, Saturated Fat, Added Sugars, Alcohol</td>
<td>Use in limited quantities to round out the menu for pleasing appearance and satisfying meals. Alcohol in moderation as appropriate (Women: up to 1 drink/day, Men: up to 2 drinks/day) and as approved by physician.</td>
</tr>
<tr>
<td>Fluids (especially water) low in simple sugars, sugar-free flavored waters, carbonated beverages</td>
<td>Fluids based on individual needs.</td>
</tr>
</tbody>
</table>

*These amounts are recommended based on a 2000 calorie meal plan by ChooseMyPlate.gov. See pages 5-30 to 5-40 for specific food amounts. Follow menus/recipes approved by RDN.

- Adjust diet as needed based on individual goals.
- Carbohydrates should be spread evenly throughout the day.
- Use a wide variety of nutrient dense foods (fruits, vegetables, whole grains, dairy products, cooked dry beans/peas/lentils) rich in vitamins, minerals and dietary fiber.
- Supplement based on individual need: multivitamin or multivitamin with minerals, calcium, vitamin D, and B₁₂ in older adults.
- Older adults may need individualized/less restrictive diets especially if intake is poor. Honor food preferences and cultural norms within reason.

1Depending on activity level, based on reference heights/weights adults aged 61+: Males (5’10”, 154#) need 2000-2400 calories; Females (5’4”, 126#) need 1600–2200 calories (47). For specific calorie level patterns, see Appendix.
2Based on individual needs.
3Sodium intake will be higher with processed foods/added salt. For individuals with prehypertension and hypertension further reduction to 1,500 mg sodium per day can result in even greater blood pressure reduction.
4Calcium: 1200 mg for females 51+, 1000 mg for males 51+ and 1200 mg for males 71+.
5Vitamin D: 600 IU for 51+ and 800 IU for 71+.

Note: Nutritional composition will change with diet liberalization.

**Bold/italicized** food items and/or portions indicate differences from Regular Diet menu

*Low in saturated fats and trans fats

+Condiments may include pepper or other spices, sugar substitute, salt, coffee creamer, etc. based on nutrition goals. Additional condiments and garnishes (i.e. margarine, gravy, sauces, ketchup, etc.) may round out the menu and make it more appealing and palatable. These add additional calories, added sugars, micro- and macronutrients and may not be appropriate for some individuals.

**When planning a consistent carbohydrate diet, it can be difficult to meet the Dietary Guidelines for Americans (DGA) (see page 1-1 in Chapter 1: Regular Diet and Alterations) recommendations while controlling carbohydrate intake. In the menu above, fruit servings are lower than recommended by the DGA to provide 3 to 4 carbohydrates per meal. This can be adjusted (for example, decrease grain servings and increase fruit servings) as appropriate to meet individual and/or facility preferences as long as the carbohydrate content remains consistent.

(References for Consistent Carbohydrate Diet: 5,44-50)
